Summary

Hi! I'm a Web Developer with a strong interest in building intuitive,
user-friendly, and performance-focused web applications that deliver
real value to users and businesses.

With hands-on experience in HTML, CSS, JavaScript, React.js,
WordPress, MySQL, and MongoDB, I combine clean UI design with
reliable functionality. I focus on writing clean, maintainable code and
creating interfaces that are responsive, accessible, and easy to use
across devices.

What I work on:

• Developing responsive and cross-browser-compatible web
interfaces
• Building reusable UI components and clean layouts
• Optimizing performance for speed and scalability
• Collaborating with designers and backend teams to turn ideas into
working solutions
• Applying modern best practices to enhance usability and
accessibility

I enjoy solving real-world UI challenges and continuously improving
my skills to stay aligned with current industry standards and
emerging technologies. My recent work emphasizes accessibility,
responsiveness, and user experience, ensuring applications are
inclusive, reliable, and future-ready.

Open to Web Developer roles that encourage learning, contribution,
and long-term growth within a collaborative team .
